KEYWORD TARGET SHEET · OCTOBER 2026

50 search terms worth targeting in the Kansas City metro

Fifty search terms people in the Kansas City metro use to find a solar installer, measured for monthly searches, click price and difficulty. 33 of them are low difficulty, and the ten below combine real volume with the clearest path to ranking.

CLIENT	PREPARED BY	DATE	MARKET
Logic Solar	Compass Marketing	October 2026	Kansas City metro

01 The ten worth going after first

#	TERM	SEARCHES	CPC	DIFF.	WHY IT EARNS ITS PLACE
1	solar panel installation	390	$21.27	20	Largest buying-intent term in the metro and the highest value. Also covers "solar panel installers".
2	solar panel installation cost	390	$18.69	29	Same volume as the core term; people pricing a system are close to a quote.
3	solar energy companies	50	$132.76	36	Highest click price on the sheet, reported from few advertisers. A strong signal, though the price may move.
4	solar companies kansas city	90	$15.63	0	Zero difficulty with a $15.63 click price. The clearest opening on the sheet.
5	solar installation kansas city	90	$9.50	0	Zero difficulty; Google pools "solar panels kansas city" and the installer variants into it.
6	solar panels for home	590	$4.81	28	Second-highest volume, all homeowner intent, and moderate difficulty.
7	solar panels	1,600	$2.96	59	Biggest volume by far. Harder (59) but too large to ignore; a long-term page target.
8	solar installer near me	40	$47.74	26	A $47.74 click price: advertisers pay heavily for this searcher. Map pack term.
9	solar companies near me	90	$10.16	23	Google pools it with "solar company near me", where Logic Solar already sits #3 in the map pack.
10	commercial solar near me	10	$41.20	6	Logic Solar already holds #1 in the map pack; $41 clicks and difficulty 6.

02 All 50 by service

1 **Numbered, tinted rows** are the ten priority terms. **Difficulty** runs 0–100; under 30 is low, 0 means almost no competition.

A dash under cost per click means too few advertisers bid for Google to report a price, not that the term lacks intent.

n/a difficulty: too little national data for a score.

Solar installation

11 TERMS

TERM	SEARCHES / MO	COST PER CLICK	DIFFICULTY
1 solar panel installation	390	$21.27	20

ground mount solar cost	10	$0.53	32
commercial solar contractor	10	—	0

Method. Map pack positions were measured on 15 October 2026 with Google Maps searches run from Logic Solar's own pin (7300 W 110th St, Overland Park, KS) and, for the reach table, from the named points. They are real results, but they reflect a searcher standing at those points: Google ranks map results by the searcher's location, so a person elsewhere in the metro will see a different order. Search volumes are Google Ads 12-month averages for the Kansas City DMA (both sides of the state line); close variants Google reports as one figure are counted once. Difficulty (0–100) is DataForSEO Labs, US. Data source: DataForSEO.
